

## FOUR SEASONS

There are four seasons in a year: spring, summer, autumn and winter. Each season is three months long.

Spring starts in March, summer in June, autumn in September, and winter in December.

The seasons repeat year after year. The weather changes each season.

### SPRING

March

April

May

Plants begin to flower.  
The weather becomes warmer.

### SUMMER

June

July

August

School is over.  
It's sunny and hot.

### AUTUMN

September

October

November

Leaves fall off trees.  
The weather becomes cooler.

### WINTER

December

January

February

It's snowy and frosty.  
We can make a snowman.
