Psychologists believe that your favourite flowers can indicate something about your personality.

What is your favourite flower?  
What it says about you?

## CARNATION

Tradition is very important to you. Your down-to-earth attitude and innate ability to keep confidences makes you one of the most loyal and trusted friends. As a result, you are always surrounded by loved ones who come to you for guidance.

## CHRYSANTHEMUM

You are the one friends turn to when they need help because they know you'll always find room in your heart and your schedule for them.

## DAISY

You notice things others miss. For example, the different shades of pink in the sky as the sun sets, the hint of sadness behind someone's smile—which means you are a natural at drinking in all life has to offer.

## IRIS

You tend to get bored quickly with day-to-day routines. In order to maintain your great vitality and creativity, you need to follow your inspiration wherever it may lead. You thrive and prosper in jobs and situations where you are your own boss.

## LILY

You are a nurturing person. In fact, people are drawn to you. A few words from you can make people feel worlds better. It's no wonder many say you would be a great therapist! However, you shouldn't feel like you have to ease everyone's troubles; your caring alone accomplishes more than you realize.

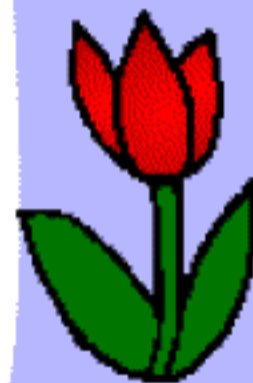

## ROSE

You are the kind of girl that will bring the Prince Charming out in a man. You are also the kind of friend who gets called first with news-big or small. Despite your wide social circle and busy agenda, you have a secret need for alone time and you will sometimes even feel a little shy.

## TULIP

You thrive on change. You are always dreaming up some way to improve yours and your family's lives. But just as a tulip blooms in the same spot each year, deep down inside, you are often content with what you have.

## VIOLET

People drawn to this flower are as vibrant as they are. You have a childlike curiosity and playfulness that helps keep you going.
